

## Reactions Recording Sheet

### *Resorts Grapple with Global Warming*

1. List two facts or statistics in the article that surprised, and two facts that confirmed what you already know or have observed about climate change in Colorado.
2. Do you agree with scientist John Harte who believes planning new ski hills and real estate is foolish or chief ski area operator Bill Jenson who deems there to be plentiful snow in Colorado for the next 50-100 years? Give your reason.
3. Explain three ways the increasing cost of fossil fuels is affecting the recreational resorts around the world.

### *Hotter, Drier Colorado*

1. Explain how water regulates temperature, and how a warmer climate changes the water cycle of the planet. How will these changes affect Colorado?

2. What is most of Colorado's water supply used for?
  
3. According to the movie, By how much is the population in Colorado going to rise by 2040?
  
  
  
  
  
  
  
  
  
  
4. What do you think will be the three biggest issues for Colorado that will come from climate change?

### *Group Activity*

5. Pretend you are an executive or owner in your group's industry and create either a poster or act out a television commercial. In your group, you need to include a brief summary of the effects that climate change is having on your industry and a marketing strategy involving new activities that will keep your company in business. Define your main audience and explain why your new activities will appeal to them. Consider and list any budget changes and risks that may be involved with your company's new activities.
